Helen: I apologize for the delay in getting back to you. I have reviewed Greg's memo and think it's OK to finalize it as is. I agree with using the Sajan \$\$ figures, given the lack of better numbers (as Greg noted); we should assume they are placeholders and they should be described as such. The information from the bottom of page 2 (need to identify historical flooding, et seq, and benefits from coordinating storm drain improvements, et seq) should be included as Plan recommendations.

thanks for your help on this.

Do you have any further comments for Greg regarding his memo to you ?
Any further Action ? In the midst of what is going on here I probably failed to mention that Greg Laird and his division will be remaining here in Seattle, and in fact these engineering groups are growing. They have several important clients including the County that they will continue to serve indefinitely. I feel that their work and service is of the highest calibre and hope you agree. If you need further work done in these areas keep them in mind.
